

Torx Rounded Head Thread-Forming Screws

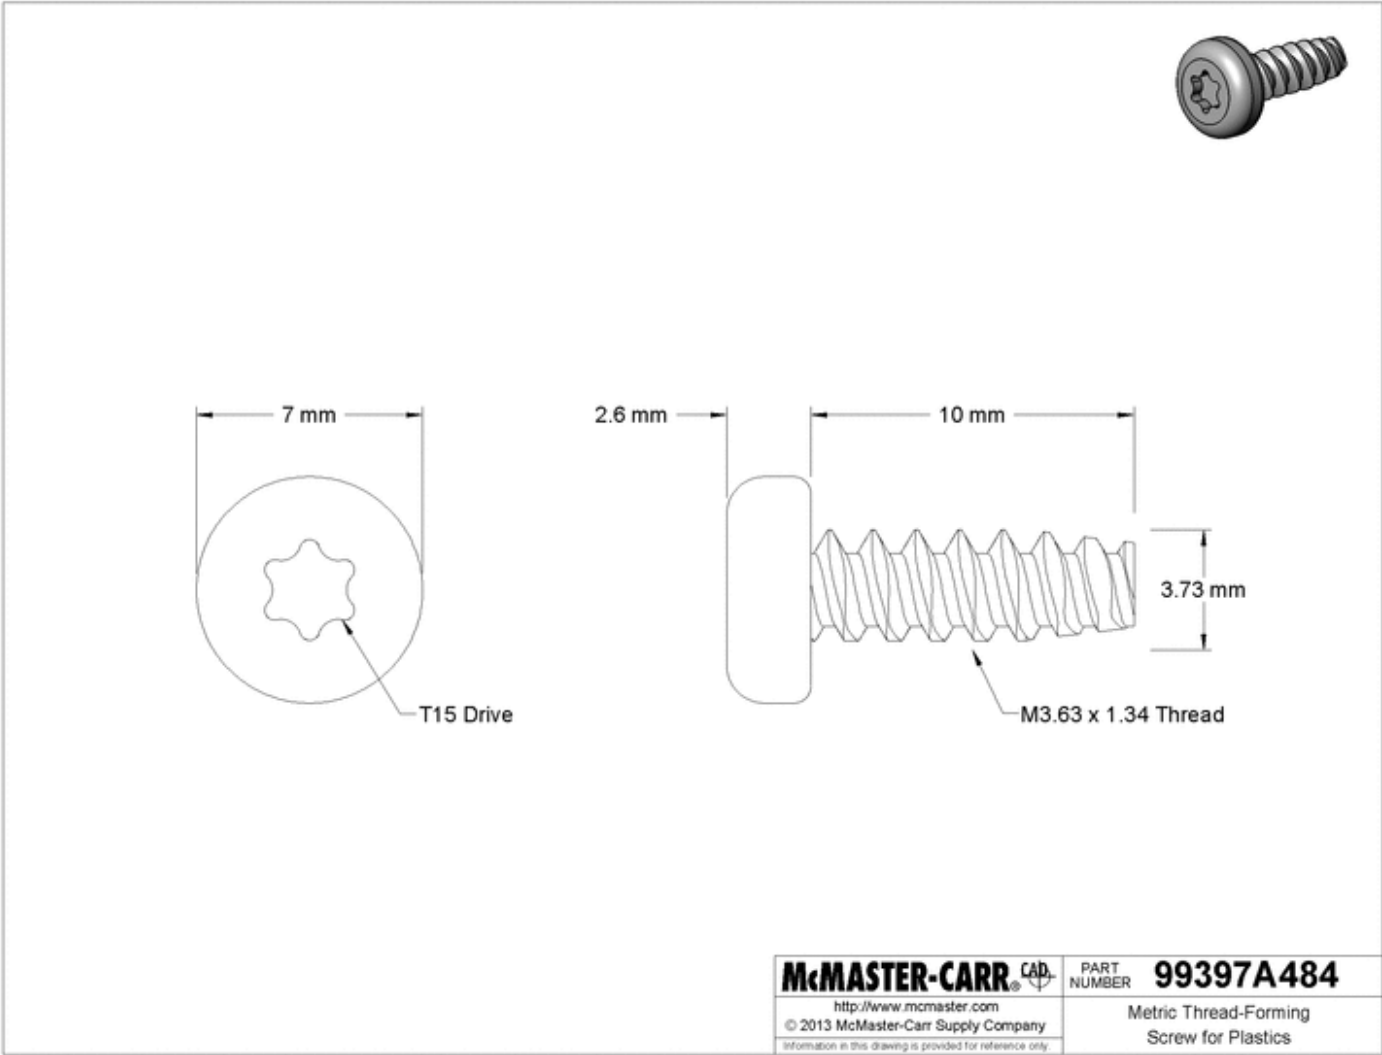

for Plastic, 18-8 Stainless Steel, M3.63 Size, 10 mm Long

\$12.63 per pack of 50
99397A484

Material	18-8 Stainless Steel
Screw Size	M3.63
Length	10 mm
Head, mm	
Diameter	7
Height	2.6
Drive Size	T15
Drive Style	Torx
Drill Bit Size	No. 1/8"
Drill Bit Size Decimal Equivalent	0.125"
Approximate Thread Pitch	1.34 mm
Thread Direction	Right Hand
Threading	Fully Threaded
Tapping Method	Thread Forming
Tapping Screw Type	TRS
Head Type	Rounded
Rounded Head Profile	Standard
Rounded Head Style	Pan
Tip Type	Blunt
Shank Cross Section	Tri-Lobe
System of Measurement	Metric
For Use In	Plastic
RoHS	Compliant

18-8 stainless steel screws have good chemical resistance and may be mildly magnetic. A Torx drive provides more points of contact than a Phillips drive, allowing you to apply extra force with less slippage or damage to the recess. Also known as Plastite screws, they have a triangular shank that presses tightly against formable plastic such as polypropylene to resist loosening. Length is measured from under the head.
